- Master of Computer Science

SKILLS

- HTML5
- CSS3 (Bootstrap,Tailwind)
- JavaScript
- React Js
- Effective Communication
- Git/Github
- MicroSoft Office

LANGUAGES

- English
- Urdu

PROFILE

I have completed my 4 months of course in Frontend Development, where I gained hands-on experience in HTML5, CSS3, JavaScript, and React.js. I have a solid understanding of modern web development tools like Bootstrap and Tailwind CSS, which enables me to create responsive and user-friendly interfaces. I'm excited to take the next step in my career and am seeking an internship opportunity to gain practical experience, build my portfolio, and contribute to a dynamic team.

PROJECTS

Todo List (React Js)
mytodoapp906.netlify.app

- This Todo List application allows you to add, remove, check, or uncheck tasks, with all data saved in local storage so it remains after reloading the page. It also features a dark and light mode toggle for user convenience, along with a time display functionality to help you stay organized while managing your tasks.

Gradient Generator (JavaScript)
gradient-generator906.netlify.app

- This Gradient Generator creates random color combinations for beautiful gradients. You can easily copy the generated code and use it wherever you need.

Pokemon (React Js)
pokemon906.netlify.app

- This Pokémon website allows you to search for your favorite characters using the search tab. You can view detailed information about each Pokémon, with the data dynamically rendered from an API using React.js.

PORTFOLIO

shoaib906.netlify.app

This is my portfolio, where you can explore my work. I design websites using HTML, CSS, Vanilla JavaScript, and React.js. Feel free to browse through my projects to see my skills in action.
